

# Low-income Californians: Save \$\$ by Driving Electric

## 1. Save on purchase price

\$5,000 off the price of a new OR USED electric car + FREE charger installed at your home.

Used EVs such as the Nissan Leaf are available on [cargurus.com](http://cargurus.com) starting at \$5,000. Here's an example:

	<b>2012 Nissan Leaf SL</b>  <b>Good Deal</b> <b>\$1,041 BELOW</b> CarGurus IMV of \$7,538	<b>Price:</b> <span style="border: 1px solid red; padding: 2px;">\$6,497 <del>\$6,997</del> \$121/mo est.</span> <b>Mileage:</b> 22,957 mi <b>Location:</b> Tracy, CA 45 mi	With \$5,000 discount, you pay \$1,497
			

See <https://cleanvehiclegrants.org/>.

## 2. Save on fuel

Electricity is already ¼ to ½ the cost of gasoline per mile. With low-income discounts of 12% to 30% on your household electric bill through the CARE and FERA programs, fuel is even cheaper. Enroll at [www.pge.com/care](http://www.pge.com/care).

## 3. Save on maintenance

Electric cars have no internal combustion engine, transmission, starter, spark plugs, valves, fuel tank, distributor, starter, muffler or timing belt. That means fewer parts to break down, and no oil changes, tune-ups or smog checks!
